

Your healthier tomorrow starts today by learning how our comprehensive testing can make a positive impact on your vascular health.

Is the SmartVascular Dx™ test right for you?

If you answer Yes to any of these questions, you might be a good candidate for the SmartVascular Dx test. The power of evidence-based and personalized information to make informed health decisions about your vascular health is empowering.

For all who are 20 years and older, do any of these apply to you:

Smoker	Yes	No
Diabetic	Yes	No
Hypertension	Yes	No
Excessive Stress	Yes	No

A family history of:

Heart Attack	Yes	No
Stroke	Yes	No
Diabetes	Yes	No

Tested positive for COVID-19?

Yes No

Vaccinated for COVID-19?

Yes No

Currently prescribed:

Cholesterol Medicine	Yes	No
Blood Pressure Medicine	Yes	No
Diabetic Medicine	Yes	No
High-Dose Biotin	Yes	No

Diagnosed with an autoimmune disease? (i.e. rheumatoid arthritis, lupus, MS, psoriasis)

Yes No

Why test for unstable cardiac lesions?

Over 70% of heart attacks are caused by the rupture of an unstable cardiac lesion, not narrowing of the arteries. 80% of heart attacks are preventable.¹

Up to 60% of patients who experience acute coronary syndrome (ACS) have no warning, no symptoms, and in many cases, only one risk factor.² SmartVascular Dx uses 7 biomarkers plus a proprietary algorithm for a comprehensive assessment of arterial conditions to identify patients with endothelial inflammation who are prone to ACS. With early detection, lifestyle modifications, medications, dietary supplements, or cardiac procedures, the risk of ACS can be significantly reduced.
